

PROG 01: Crunch Time

Crunch Time is a very simple app which, given a length/number of reps of an exercise, lists the approximate calories burned by doing said exercise, as well as how much of each other exercise would result in the same number of calories burned.

<u>Demo video</u> <u>GitHub repository</u>

Screenshots

Main screen: **▼** ∡ 💈 11:54 **Crunch Time** You did 0 push-ups! You burned calories! That's the same amount of work as... Doing push-ups! ree for personal use 0

Doing calculations: Select a "source" exercise by swiping through the top cards. As you change the number of reps/minutes of the source, the number of calories and "target" reps/minutes are updated.
